EDUCATION

University of Maryland, Robert H. Smith School of Business

College Park, MD

Master of Science in Information Systems

Expected Dec 2026

Relevant Coursework: Database Management Systems, Data Analysis in Python, Data Analytics, Data Models & Decision Using R, Enterprise Cloud Computing & Big Data, Designing Artificial Intelligence Systems.

Dayananda Sagar University

Bengaluru, India

Bachelor of Technology, Electronics & Communications Engineering

Oct 2023

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML/CSS, R

Libraries & Frameworks: Pandas, NumPy, PySpark, Scikit-learn, XGBoost, LangChain, FAISS, Flask, Streamlit, React.js, Node.js

Databases & Warehouses: GCP BigQuery, MySQL, MongoDB, Snowflake, Neo4j

BI & Visualization: Tableau, Power BI, Power Query, Looker Studio, Excel

Big Data & Cloud: Apache Spark, Hadoop, Kafka, Airflow, GCP Cloud Storage, Dataflow

LLM & Analytics: RAG, Prompt Engineering, Agentic Systems, LLM APIs

Developer Tools: Git, GitHub, Docker, JIRA, Confluence

WORK EXPERIENCE

Mathco, Bengaluru, India

Data Analyst, Jan 2024 – Jul 2025

- Queried **Walmart retail data** across **6+ business segments** in **BigQuery** using window functions and period-over-period logic to track market share, category movement, and vendor trends, flagging **\$20M in growth opportunities**.
- Standardized multivendor retail extracts in **Pandas** by resolving vendor naming issues, realigning category codes, and converting **4+ date formats** into a unified schema before loading into **BigQuery staging tables**.
- Built a **SQL validation layer** with row-count checks, vendor-segment rules, date-bound assertions, and QA logging, catching upstream data issues early and reducing recurring pipeline errors by **60%**.
- Converted ad-hoc **BigQuery reports** into scheduled SQL workflows that refreshed KPI tables nightly with deduplication checks, reducing reporting time from **2 days to 6 hours**.
- Built **Tableau time-series benchmarks** to compare product, category, and vendor performance against historical baselines, summarizing outliers in **Excel KPI trackers**.

Shazab Future Tech Solutions, Bengaluru, India

Software Engineering Intern, Jan 2023 – Jun 2023

- Designed and deployed **React.js analytics dashboards** for **2 enterprise networking hardware product lines**, connecting **Node.js REST APIs** with **MongoDB** to display real-time telemetry.
- Supported sprint delivery for a **5-member agile team** using **JIRA** and **Confluence** to track tasks, document API logic, and manage dashboard requirements.

PROJECT EXPERIENCE

Forensic Analytics Dashboard – Demo

Python, Pandas, Streamlit, Data Validation, Anomaly Detection, EDA, KPI Reporting

- Built a **Streamlit forensic analytics dashboard** for EY's "Swindle in the Age of AI" challenge using **Pandas EDA**, anomaly detection, chronological checks, and field-level validation.
- Flagged **45.2% of invoices** for timing violations, identified **1,080 pre-hire assignment errors**, and detected **818 of 4,673 line items** with pre-release sales anomalies, earning **Best Data Scientist**.

NexGen Agentic Platform – Demo

Streamlit, LangChain, LLM Agents, RAG, Prompt Engineering, Vector Storage

- Architected a full-stack **agentic application** using **Streamlit, LangChain, LLM agents, and RAG**, building pipelines for knowledge ingestion, vector storage, and retrieval.
- Led a **4-member team** as technical lead, driving frontend, backend, prompt engineering, and agent logic, earning an **Honorable Mention**.

RetailIQ – Retail Analytics Intelligence Platform – Demo

Python, dbt, Snowflake, Airflow, Streamlit, Docker, SQL, OpenAI, Demand Forecasting

- Built **RetailIQ**, a **Snowflake-backed retail intelligence platform** that turns **Walmart sales data** into demand forecasts, stockout risk scores, anomaly alerts, and executive dashboards.
- Deployed the app on **Google Cloud Run** with **dbt, Airflow, Docker, and OpenAI-powered analysis**, including production-style pipeline health monitoring and governed **Snowflake SQL access**.
