PROFESSIONAL SUMMARY

Data Analyst with 1.5 years of industry experience building SQL pipelines, automating KPI reporting, and delivering stakeholder-ready insights from large-scale retail data. Proficient in Python, BigQuery, Snowflake, Tableau, and Power BI, with project experience in demand forecasting and LLM-powered analytics.

EDUCATION

University of Maryland, Robert H. Smith School of Business

Master of Science in Information Systems.

College Park, MD

Expected Dec 2026

Dayananda Sagar University

Bachelor of Technology, Electronics & Communications Engineering.

Bengaluru, India

Oct 2023

EXPERIENCE

Data Analyst

Jan 2024 – Jul 2025

Mathco

Bengaluru, India

- Queried Walmart retail data across 6+ business segments in BigQuery using window functions and period-over-period logic, flagging \$20M in stakeholder-validated growth opportunities.
- Standardized extracts from 20+ vendors in Pandas by resolving naming inconsistencies, realigning category codes, and converting 4+ date formats into a unified schema for BigQuery ingestion.
- Built a SQL validation layer with row-count checks, segment rules, and QA logging, reducing pipeline errors by 60%.
- Automated ad-hoc BigQuery reports into nightly SQL workflows, cutting reporting time from 2 days to 6 hours.
- Built Tableau time-series benchmarks comparing product, category, and vendor performance against historical baselines.

Software Engineering Intern

Jan 2023 – Jun 2023

Shazab Future Tech Solutions

Bengaluru, India

- Designed and deployed React.js analytics dashboards for 2 enterprise product lines, connecting Node.js REST APIs with MongoDB to display real-time telemetry.

PROJECTS

Forensic Analytics Dashboard - <https://eyforensic.streamlit.app/>

- Built a Streamlit forensic analytics dashboard for EY's 'Swindle in the Age of AI' challenge using Pandas EDA, anomaly detection, and data validation.
- Flagged 45.2% of invoices for timing violations, detected 818 of 4,673 line items with pre-release anomalies, earning Best Data Scientist.

RetailIQ: Retail Analytics Platform - <https://retailiq-demand-intelligence-420746557396.us-central1.run.app/>

- Built a Snowflake-backed retail analytics platform transforming Walmart sales data into demand forecasts, inventory risk scores, anomaly alerts, and executive dashboards.
- Deployed on Google Cloud Run with dbt, Airflow, Kafka, and Docker, with automated orchestration and data quality checks.

NexGen Agentic Platform - <https://nexgen-ai.streamlit.app/>

- Architected a full-stack agentic application using LangChain, LLM agents, and RAG for knowledge ingestion, vector storage, and retrieval, earning an Honorable Mention as team technical lead.

AWARDS & HONORS

- Best Data Scientist Award (2026): EY x UMD 'Swindle in the Age of AI' Challenge.
- Honorable Mention (2025): Agentic AI Case Competition, NexGen agentic platform.
- Project Impact Recognition Kudos (2025): Mathco, for ownership, QA rigor, and automation of Walmart retail workflows.
- Best Capstone Award (2024): Mathco Training Program, selected among 150 trainees.

SKILLS

Programming Languages: Python, SQL, R, JavaScript

BI & Visualization: Tableau, Power BI, Looker Studio, Excel

Databases & Warehouses: GCP BigQuery, Snowflake, MySQL, MongoDB

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, XGBoost, PySpark, Streamlit

Big Data & Cloud: Kafka, Airflow, GCP Cloud Storage, Docker

LLM & Analytics: RAG, Prompt Engineering, LLM APIs

Developer Tools: Git, GitHub, JIRA
