PROFESSIONAL SUMMARY

Data Engineer with 1.5 years of experience building SQL pipelines, automating ingestion workflows, and engineering retail data infrastructure across BigQuery and Snowflake. Proficient in Python, SQL, Airflow, Kafka, dbt, and Docker, with experience in cloud-native orchestration and LLM-powered platforms.

EDUCATION

University of Maryland, Robert H. Smith School of Business <i>Master of Science in Information Systems.</i>	College Park, MD <i>Expected Dec 2026</i>
Dayananda Sagar University <i>Bachelor of Technology, Electronics and Communications Engineering.</i>	Bengaluru, India <i>Oct 2023</i>

EXPERIENCE

Data Analyst <i>Mathco</i>	Jan 2024 – Jul 2025 <i>Bengaluru, India</i>
- Standardized extracts from 20+ vendors in Pandas, resolving naming inconsistencies and converting 4+ date formats into a unified schema for BigQuery ingestion. - Developed a SQL validation layer with row-count checks, segment rules, and QA logging, cutting pipeline errors by 60% across 5 pipelines processing millions of rows monthly. - Automated ad-hoc BigQuery reports into nightly SQL workflows, reducing reporting time from 2 days to 6 hours. - Queried Walmart retail data across 6+ segments in BigQuery using window functions and period-over-period logic, flagging \$20M in growth opportunities.	
Software Engineering Intern <i>Shazab Future Tech Solutions</i>	Jan 2023 – Jun 2023 <i>Bengaluru, India</i>
Designed and deployed React.js analytics dashboards for 2 enterprise product lines, connecting Node.js REST APIs with MongoDB to display real-time telemetry.	

PROJECTS

RetailIQ: Retail Analytics Platform - <https://retailiq-demand-intelligence-420746557396.us-central1.run.app/>

- Architected a Snowflake-backed platform processing 421K sales rows across 45 stores, generating 425K forecast rows plus stockout-risk and anomaly output tables.
- Engineered a 9-step Airflow DAG with 16 dbt models, 82 data quality tests, and a Dockerized Kafka layer for near-real-time sales event streaming into Snowflake.

Forensic Analytics Dashboard - <https://eyforensic.streamlit.app/>

- Built a Streamlit forensic dashboard for EY's 'Swindle in the Age of AI' challenge; flagged 45.2% of invoices and detected 818 of 4,673 pre-release anomalies, earning Best Data Scientist.

NexGen Agentic Platform - <https://nexgen-ai.streamlit.app/>

- Architected a full-stack agentic app using LangChain, LLM agents, and RAG for knowledge ingestion, vector storage, and retrieval, earning an Honorable Mention as team technical lead.

AWARDS & HONORS

- Best Data Scientist Award (2026): EY x UMD 'Swindle in the Age of AI' Challenge.
- Honorable Mention (2025): Agentic AI Case Competition, NexGen agentic platform.
- Project Impact Recognition Kudos (2025): Mathco, for ownership, QA rigor, and automation of Walmart retail workflows.
- Best Capstone Award (2024): Mathco Training Program, selected among 150 trainees.

SKILLS

Databases and Warehouses: GCP BigQuery, Snowflake, MySQL, MongoDB

Big Data and Cloud: Kafka, Airflow, dbt, GCP Cloud Storage, Docker

Programming Languages: Python, SQL, R, JavaScript

Libraries and Frameworks: Pandas, NumPy, PySpark, Scikit-learn, XGBoost, Streamlit

LLM and Analytics: RAG, Prompt Engineering, LLM APIs

BI and Visualization: Tableau, Power BI, Looker Studio, Excel

Developer Tools: Git, GitHub, JIRA
